The nansai (222) literally means 'a mountain island', hence a very tall and rocky mountain range surrounding a large marshland area. The nannies can usually be found on rocks and small creeks, often at the end of long paths to reach the shore. The term 'nanny' in Japanese is often taken as a metaphor for any person who looks after a child, often for children to have care of their parents. In this short movie, we learn about Nani and how she lives with her parents and her family. The parents have always been very strict in their regulations around Nani; the only time they visit them is when their children have already developed or had grown up. These strict rules have made Nani and her father quite isolated during her childhood. She is only able to get in touch with a few friends through the internet and phone, the most famous of which is her twin sister Aku. Nani and Aku spend their time on one mountain island off the coast surrounded by rocky creeks and the sea. Nani spends her time fishing and exploring with her little sister Aku and her siblings as well as visiting her aunt and uncle who live nearby to the island.Nani's parents have always been very strict in

their regulations around Nani; on some occasions you will hear a 'kagaku jidai ' or verbal challenge from the father (or grandfather) to the mother (or grandmother) during a visit to the nannies to see if she or he wants to join Nani in the village - sometimes they may even come to the beach to pick up their children, but they usually only ever come to the forest which is in the back of the island. Nani's own relationship with her mother is quite interesting however, there have been times when she has been allowed to go on outings by the Nannies. Sometimes she spends the evening with the Nannies and the other times HD..
